

# HSE Services

Your safety, our expertise

## Introduction

At Maersk H2S Safety Services, we are dedicated to constant care, addressing today's challenges while preparing for tomorrow's risks. This commitment drives us to exceed industry standards, ensuring our clients receive the most innovative and effective HSE services in the energy sector. We offer tailored services through our expert HSE Officers, Supervisors, and Superintendents, ensuring safety, compliance, and sustainability in both the Oil & Gas and Renewable Energy sectors.

## Our Core Values

Driven by purpose, guided by values. The Maersk values have been shaped and strengthened since its foundation in 1904.

In good times and in challenging times, our values are constant and guide us to make considered and sustainable decisions.

They define our behavior, our words, and our intentions. Uniting us across continents through a common code and culture.

Our values represent the commitment we make, together.  
To be trusted to do the right thing. Always.

## Our Journey

Founded in 1985 in response to high H2S concentrations in the North Sea, Maersk H2S Safety Services began in Svendborg, Denmark. We started by training our first H2S Supervisors with a focus on experience and uncompromising safety standards, a commitment that remains central to our operations to this day.

Since then, we have expanded globally, with offices in Denmark, Italy, Norway, Brazil, Australia, Brunei, Congo, the UK, and MENA. We provide H2S safety services across diverse regions, including the North Sea, Middle East, the Americas, and Far East, consistently exceeding customer expectations.

## Expanded services

Building on our expertise in H2S safety, we have expanded our services to include safety services for other gases and toxic substances, as well as comprehensive HSE services. This expansion allows us to address a broader range of safety challenges and provide holistic solutions to our clients.

# Our HSE Services

## Health, Safety & Environmental Compliance

We oversee the implementation and maintenance of safety management systems across large-scale oil & gas and renewable energy operations, ensuring compliance with all local, national, and international regulations.

## Risk Assessment & Management

We provide guidance on complex risk scenarios, oversee risk management strategies, and conduct risk assessments to identify hazards, ensuring alignment with company-wide safety policies and industry standards.

## Safety Campaigns & Awareness

We lead safety campaigns, facilitate employee participation in safety drills, and coordinate tailored programs to address specific risks.

## Incident Investigation & Reporting

We oversee and lead investigations into incidents of all sizes, ensuring thorough root-cause analysis, detailed reporting, and compliance with industry standards. We recommend preventive measures and corrective actions to address incidents.

## Environmental Protection & Management

We oversee environmental strategy and management programs, ensuring sustainable practices, minimal environmental impact, and full compliance with environmental regulations.

## Emergency Response Planning & Support

We provide strategic oversight on emergency preparedness, lead emergency response drills, and assist in developing comprehensive emergency response plans.

## Safety Equipment & PPE Oversight

We standardize PPE programs across all teams and projects, ensuring proper usage, maintenance, and compliance with safety standards.

## Continuous Improvement & Reporting

We oversee the corporate-wide HSE performance reporting system, track safety metrics, implement continuous improvement strategies, and collect staff feedback to identify areas for improvement.

# Why Choose Maersk H2S Safety Services?

**01**

## **Experienced Team**

Our highly skilled professionals bring decades of industry experience and specialized knowledge. They work diligently, adhering to well-defined procedures to ensure optimal results for your business. Our recruitment process includes thorough personality assessments, selecting only the most qualified and talented professionals to join our team.

**02**

## **Independent and Unbiased Assessments**

We provide independent and unbiased safety assessments, ensuring our evaluations are objective. This impartial approach helps us identify potential risks and implement effective safety measures without any conflicts of interest.

**03**

## **Tailored Solutions**

We provide customized approaches designed to align with your unique objectives, delivering measurable and impactful results for your business growth.

**04**

## **Operational Excellence**

Utilizing the Maersk Management System, we implement clear, structured procedures and a resource planning framework to ensure operational efficiency and optimal performance.

**05**

## **Continuous Compliance & Training**

We closely monitor certifications to ensure compliance with industry standards and regulations. Through comprehensive training at the Maersk Academy, our team stays ahead of industry trends and is always ready for new challenges.

## Testimonials

This is my second time working with the HSE Supervisor at two different locations. He has always shown a keen interest in the operations and advised on the HSE/safety aspects of the operations, great knowledge and support. He has always provided good support and knowledge and always seems to be thinking ahead and what potential safety issue could be in the upcoming operations. I would recommend him for any operation due to knowledge and expertise and good communication skills with all
